176 Dikhibidung Section, Wonderkop, Brits, 0317

01 · WHO WE ARE

Technical expertise. Turnkey delivery.

Meta Impact (Pty) Ltd is a South African technical services and construction company. We install and support electrical, solar, instrumentation and IT systems, and we build and maintain sanitation facilities, internal roads and residential and commercial properties.

Established in 2023, the company is led by Tumelo Diale, a director with more than ten years of hands-on experience across instrumentation, electrical, solar, IT and construction environments. We read the drawings, set out the site and manage each trade ourselves, so the client deals with one accountable contractor from first site inspection to final handover.

ESTABLISHED	REG. NO.	BASE	B-BBEE
2023	2023/174219/07	Wonderkop, North West	Level 1 Contributor

OUR MISSION

To deliver safe, compliant and dependable technical and construction solutions, on time, to specification and built to last.

OUR VISION

To be the trusted turnkey partner for technical, energy and infrastructure projects, recognised for safety, workmanship and reliability.

HOW WE WORK

Zero Harm First

Safety engineered into every activity: risk assessments, permit-to-work and isolation procedures.

Technical Precision

Installed, tested, verified and documented to specification.

Right First Time

Disciplined execution and quality workmanship that minimise rework and downtime.

Compliance Without Compromise

Legislation, client standards and governance built into how the work is done.

Sustainable Impact

Long-term value through efficiency, preventive maintenance and less waste.

Integrity & Accountability

Transparent, ethical, and we own our outcomes.

A SNAPSHOT OF OUR WORK

Solar PV panel installation

Control panel installation

School sanitation facility, KwaZulu-Natal

02 · WHAT WE DO

One contractor. Drawing to handover.

Four service lines, one management team. We self-perform the core trades and bring in specialist skills where a project needs them.

Instrumentation & Control

- Instrumentation installation, calibration, testing and commissioning
- Control panel and system integration support
- Instrument tubing, field wiring and industrial plant site work
- Tested, verified and documented to specification

Electrical, Solar & Energy

- Electrical installations, fault finding and system upgrades
- Electrical DB and small-power repairs
- Solar PV mounting structures and installation
- Energy optimisation, maintenance and repairs

IT & Technical Support

- IT infrastructure and technical support
- Computer lab setup and IT support
- System integration support for facilities and plant

Construction, Civils & Maintenance

- General buildings, school and public sanitation facilities
- Internal roads: layerworks, kerbing and block paving
- Brickwork, plastering, painting, tiling and plumbing repairs
- Planned and term maintenance programmes
- Architectural consultation and drawings

HOW WE DELIVER

01	02	03	04	05
Brief & site inspection	Design, costing & proposal	Mobilise & safety onboarding	Build, inspect & test	Handover & documentation

SECTORS WE SERVE

Industrial & commercial technical services	Solar & energy	Education & public infrastructure	Municipal & community roads	Residential & property maintenance

Technical delivery: solar PV, industrial plant work and instrument tubing and field wiring

03 · SPECIALIST CAPABILITY, SAFETY & QUALITY

Technical depth behind every build.

We install and support the electrical, solar, instrumentation and IT systems that keep facilities running. Safety is planned in from the start, including fall protection for all work at height.

Solar PV panel installation

Roof-mounted PV works with fall protection

Control panel installation

Instrument tubing and field wiring

Industrial plant site work

Computer lab setup and IT support

SAFETY & QUALITY

Full fall-arrest PPE for work at height

SAFETY

- Structured risk assessments before work starts
- Permit-to-work and isolation procedures
- PPE and fall protection for work at height
- Issues and incidents reported openly

QUALITY

- Work set out from approved drawings
- Inspection at each stage before the next trade starts
- Electrical and instrument work tested and verified
- Handover with completion documentation

05 · WHY META IMPACT

What you get when you appoint us.

Technical depth

Instrumentation, electrical, solar and IT capability, with the building and civil trades under one roof, all managed by one team on site.

Single-point accountability

One contractor from setting out to handover. Fewer interfaces, fewer delays, one team answerable for the result.

Safety by design

Risk assessments, permit-to-work and isolation procedures, and fall protection for work at height.

Referenced delivery

Recommended by our main contractor for turnkey delivery of school sanitation facilities.

B-BBEE Level 1

Maximises the client's procurement scoring and supports local skills and employment.

Partner-ready

Comfortable as main contractor, subcontractor or joint-venture partner, proven with Themane Management Consulting and Theo Construction.

HOW TO ENGAGE US

Direct appointment

Tell us the scope and drawings. We provide a costed proposal and a clear programme.

Subcontract

We deliver defined packages, from instrumentation, electrical and solar to sanitation blocks, roads and maintenance, under your main contract.

Joint venture

We combine capacity with established contractors to pursue larger projects, as with Theo Construction.

Our technical teams at work: solar PV, instrumentation and IT

06 · COMPLIANCE & CONTACT

Compliance and credentials.

REQUIREMENT	DETAIL	REFERENCE / EXPIRY
Company registration (CIPC)	Registered company	2023/174219/07
B-BBEE status	Level 1 Contributor	[08-April-2027]
Central Supplier Database (CSD)	National supplier registration	[MAAA1479833]

GET IN TOUCH

Let’s build something that lasts.

Send us your scope or drawings and we will respond with a site inspection date and a costed proposal.
